

Supply Chain Considerations

Ry Smith

October 17th, 2024

Ry Smith, P. Eng

Ry is the CTO of Change Energy and is a specialist in the design, modeling, and analysis of gaseous fuel stations and systems, assessing their technical, economic, and environmental attributes. Ry is deeply involved with Codes and Standards work as well, he is chair of the CSA Transportation Strategic Steering Committee and technical sub-committee B108, Natural Gas Refueling Stations. Ry has over 35 years of experience in the assessment and development of high-pressure gaseous refueling station projects.

Change Energy Engineering

We are an Engineering Consulting firm focused on the Low Carbon Economy

- Change Energy's entire 30-year history has been focused on alternative fuels as a way to improve people's lives. Our experience is international, including the development of well over 175 gaseous vehicle refueling stations and virtual pipelines.
 - We help our clients move from the conceptual to the actionable
 - We plan and execute major fuel system transitions, within client operations, to achieve desired economic and environmental outcomes.
